What do economists mean by growth?

Definition

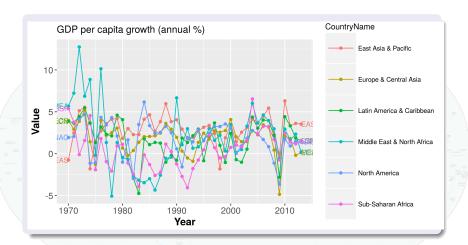

by Growth we mean the annual percentage variation of the GDP per capita in local currency. More formally,

$$Growth_t := \frac{GDP_t - GDP_{t-1}}{GDP_{t-1}}$$
 (1)

where GDP is the Gross Domestic Product per capita

World economic growth from 1970 to 2010

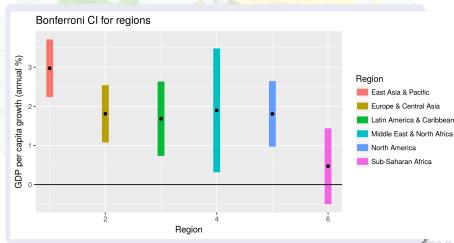

questions

- can we say that there was no growth over this time span?
- what happened in 2008/2009?

T2 test

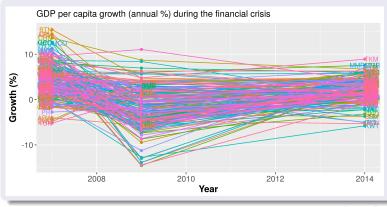

$$\begin{cases} H_0 & : \underline{\mu} = \underline{0} \implies \text{no growth over the considered time span} \\ H_A & : \underline{\mu} \neq \underline{0} \end{cases}$$

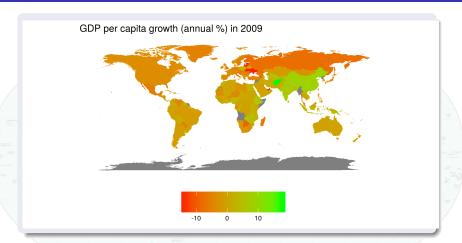

repeated measures test

$$\begin{cases} H_0 & : C\underline{\mu} = \underline{0} \implies \mu_1 - \mu_2 = 0 \quad \text{and} \quad \mu_1 - \mu_3 = 0 \\ H_A & : C\underline{\mu} \neq \underline{0} \end{cases}$$

p.value = 0

What affects growth?

questions

- during an economic crisis does geography play a role?
- does an economic crisis strike heavier high-income countries than low-income ones?

ANOVA two-way

during an economic crisis

 $\mathsf{Year} = [2007, \, 2009, \, 2014]$

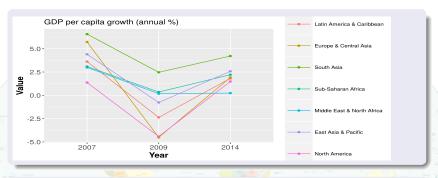

315.58	52.60	4.43	
	0=.00	4.43	0.0002
3362.03	1681.01	141.59	0.0000
894.73	74.56	6.28	0.0000
6328.06	11.87		
	894.73	894.73 74.56	894.73 74.56 6.28

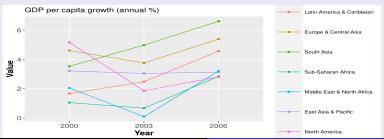

not economic turmoils

Year = [2000, 2003, 2006]

	Df	Sum Sq	Mean Sq	F value	Pr(>F)
fRegion	6	875.35	145.89	7.37	0.0000
Year	2	317.40	158.70	8.02	0.0004
fRegion:Year	12	171.12	14.26	0.72	0.7318
Residuals	556	11001.81	19.79		

let's visualize the interaction

Does IncomeGroup affect Growth?
